Progress!

Construction is moving forward and we are seeing a lot of progress fast in Nepal!

It was great to be back there this February with friends from Wisconsin, Texas and Alabama helping to move the work forward! **Thank you** for keeping Laci and I on the job with [Builders International!](#)

We have such an amazing opportunity with this construction project to impact the lives of individual **students with the opportunity to attend college**. Not only that, but they are being trained to **plant and lead churches...** taking the Gospel to unreached people in this beautiful Himilayan nation.

Of the nearly 400 graduates from this school since 1981, 90% of them are still active in ministry today! This is fertile soil in a country where our national church partners are **planting 100 churches per year**.

Help keep the work moving...

Without trained leaders, this growth is greatly hampered!! This dorm is a key strategic component.
