It's Still a Huge Mess!

The amount of damage and destruction still so evident was a huge surprise. It is time to rebuild! Hurricane Irma devastated several Caribbean islands nations this past September, including Puerto Rico and British Virgin Islands.

The small building circled in red is missing the second floor, completely removed by the storm winds!

I am so excited about the opportunity for [Builders International](#) to partner with [Convoy of Hope](#) in some of the long term recover work to help rebuild in communities of the British Virgin Islands.

Jost Van Dyk...Time to Rebuild

Builders International is working with Convoy of Hope to design and build a new school on this small British Virgin Island, completely devastated by Hurricane Irma last September! What an honor to have the opportunity to help rebuild this school...but better!

Thank you for enabling Team Moore in or work with Builders International!

Ryan with Architect Chris Blackard in front of current school being patched up until the new school is built.
